THE PLAYBALL (Ages 4 – 5) & PLAY SPORT (Ages 6 and Up) PROGRAM:

Playball & Play Sport is a fun, structured and active way of engaging children in physical activity at a young age. Our scientifically researched curriculum provides a good platform for enhancing life skills and building a strong base for confident sport participation. Our goal is clear, to teach sport properly so that any child who attends one or all of our five programs will achieve a level of competence providing them with a springboard into future sports participation. The Playball & Play Sport program is for boys and girls of every ability and interest, as well as providing foundation sport skills for athletes of the future. The success of the Playball sport program is that through competent sports participation, your child will secure a solid base from which to develop many other and more important aspects of their lives. Classes have 6-12 children (depending on their age) and are 30 minutes long. Classes are Progressive. No two classes are the same. Children progress from an informal introduction to ball and motor skills, to more structured sports participation leading into the Play Sport program. Playball & Play Sport also develops life skills alongside sport skills.

HOW DOES IT HELP CHILDREN?

We use the medium of sports, not only to improve gross motor development, increase concentration skills, build low muscle tone, to teach children to be competent in hand-eye/foot-eye coordination and improve balance; but sport is also used to teach basic, yet essential life skills. At Playball & Play Sport your children will learn persistence, courage, cooperation, respect, positive relationships, self-worth, communication, responsibility, and countless other attributes. We address the needs of the whole child – dealing with the emotional, social, cognitive, and physical.

DINKIES OBJECTIVES (Ages 4-5)

The ‘DINKIES’ program is specifically designed for 4 and 5 year olds and is perfect for children just starting school. Using a series of structured lessons, children are given the opportunity to practice skills that will develop their confidence to begin the exciting journey into sport participation.

In this stage children begin the process of reaching the “mature stage” of movement development. They are ready to cope with putting the foundation skills together and tackle more advance skills.

Our DINKIES program develops a wide variety of ball skills, places an emphasis on individual participation, and helps to give children the necessary confidence to overcome any fears or anxieties about playing sport.

PLAY SPORT OBJECTIVES (Age 6 AND OLDER)

It is in this age group that kids are actually involved in sport. Successful completion of the PLAY SPORT program provides all the skills a child needs to play the game.

The PLAY SPORT program covers all of the most popular school sports: soccer, hockey, rugby, tennis, volleyball & basketball – an introduction to the basic rules of each game, development of specific skills related to each sport, as well as development of more complex work like attack and defense.

Children who have done PLAYBALL for years are confident working with sports equipment and handling any type of ball. By supporting youngsters through multi-sports activities they are able to quickly adapt to new rules and new sports. A genuine enthusiasm for sport participation is established at PLAYBALL.
